SAN GABRIEL VALLEY CLEANUP PROGRAM - OSCO FACILITY, AZUSA (FILE NO.108.0314)

Dear Ms Tagawa:

In a letter dated September 24, 1998, Regional Board staff asked you to implement a quarterly groundwater sampling and analysis for perchlorate, 1,4-dioxane, N-nitrosodimethylamine (NDMA) and Methyl Ter-Butyl Ether (MTBE).

We have received a copy of your December 30, 1998 facsimile report containing the data for the first round of sampling and analysis. The report indicates that you have not used the lowest possible detection limits, especially for 1,4-dioxane and NDMA.

Please use the lowest possible reporting limits for the four chemicals. Based on the results of those facilities that have already complied with the December 30, 1998 reporting date, the following reporting limits were achieved: 1) 4 ug/L for perchlorate; 2) 0.033 ug/L for NDMA; 3) 2 ug/L for 1,4-dioxane; and 4) 10 ug/L for MTBE.

Please submit your next report by March 30, 1999. If you have any questions, please call me at (323) 266-7534.

Sincerely,

**E. G. SOLOMON**  
Associate Engineering Geologist
